

### **Student Involvement In Decision Making**

The Board recognizes the importance of assessing the views, needs and recommendations of students in the formulation of educational policies which directly affects them.

In the development of policies and regulations, the Superintendent will solicit, when appropriate, input from students who will be affected by such provisions and advise the Board of those student attitudes and opinions. In addition, the Superintendent will provide a procedure through which students can readily communicate their ideas, attitudes and opinions regarding the operation of the District.
